40G Optical Switch 2026 Model

Overview

The Arista QSFP-40G Universal transceiver is a pluggable optical transceiver in an industry standard QSFP+ form factor that can operate with both duplex multi-mode and single-mode fiber. If you need dense 10G fiber access with 100G uplinks (and room to grow with interface modules), start with S6520X-30HC-EI / S6520X-54HC-EI: they ship with QSFP28 100G uplinks that can break out to 4×25G. This document provides an overall description of the CE12800 series switches hardware, helping you obtain detailed information about each chassis, power module, fan module, card, cable, and pluggable modules for interface. A Huawei 40G switch refers to a managed Ethernet switch from Huawei's CloudEngine or S-series portfolio that supports at least one 40 Gigabit Ethernet (40GbE) interface—typically via QSFP+ ports using optical or DAC cables. The S4600-20X4Y2B has 20×10G and 4×25G ports, providing flexible access capabilities, and 2×40G uplink ports, providing high-performance uplink, fully meeting the needs of high-performance networks. It supports bandwidth expansion through link aggregation, greatly improving the data forwarding.
