Are there electrical wires under the household electrical distribution box

Overview

The electricity supply is supplied from the utility company into the electric meter then in to the mains electrical box by thick power cables. These cables enter into an isolating device called "The Main Switch" or "Main Breaker". House wiring (or residential electrical wiring) refers to the set of conductors, protective devices (circuit breakers/fuses), sockets, switches, light fittings and earthing arrangements installed to distribute electricity within a dwelling. Its primary purpose is to ensure that electricity reaches every corner of your house safely and efficiently.

Are there electrical wires under the household electrical distribution
