## Overview

Modern OLTs support various technologies including GPON, XG-PON, and NG-PON2, with prices varying based on port density, supported bandwidth, and additional features. This guide will walk you through the key factors to consider when budgeting for your optical fiber network installation, ensuring you make informed decisions that align with your financial goals. A Fiber Optic MST Box, or Multiport Service Terminal, is a weatherproof outdoor fiber distribution enclosure that connects feeder cables to drop cables in FTTx (Fiber to the x) networks. These plug-and-play boxes are pre-terminated and pre-tested to minimize on-site splicing and reduce installation. In every fiber build, there's a quiet place where the glass path meets the real world: the fiber optic terminal box.
