Bus duct and cable tray prices

Overview

Note: Costs are typical averages and vary by location, labor rates, and specific project requirements. Eaton's Cable Bus is a customizable, enclosed power distribution system designed to safely and efficiently manage high-capacity electrical loads from 600-35,000V and 800-6,000A. Cable systems begin requiring multiple parallel conductor runs, which multiplies both copper costs and labor hours. Cable Bus is more economical than non-segregated phase bus duct and field proven for over 45 years to be the most reliable, cost-effective, flexible and maintenance free, low to medium voltage (600V. When your next industrial project demands reliable power distribution above 600 amps, the choice between bus duct and traditional cable with conduit can impact your budget by 30% or more.
