Buttons on the KVM switch

Overview

There are two methods to control the KVM Switch for PC switching: using the Face-Panel Push Buttons or Hotkey Commands. The Face-Panel Buttons allow a direct control over PC port switching; simply press the button to switch PC port. Hot-key switching is a feature typically available on KVM switches and keyboard/mouse (KM) switches that supports switching the focus from one computer to another by means of using a combination of keys (i. " "My keyboard does not have a Scroll Lock button ● Use Right-Ctrl, Right-Ctrl, 1, or 2 to confirm the trigger isn't already set to. 0 Audio DVI-I 4 Operation, Computer / Port Switching (Continued) Hotkey Switching and Configuration Commands * stands for the universal hotkey (factory default is SCROLL LOCK. The Switch provides the highest security safeguards and features that meet today's.
