Cable tray turns horizontally downwards

Overview

Cable sag results from incorrect spacing of cable tray supports or from employing the incorrect tray type that is, light-duty perforated trays in high-load applications. Placing channel cable trays upside down is also desirable, I have seen some constructions using this positioning, mainly for small size ones. This situation may be caused by excessive current in that phase or a quality issue with the cable itself. I've managed to do this with incredible struggle, but when I extend the length of the tray or try to add a fitting, the cable tray snaps back to it's.

Cable tray turns horizontally downwards

Cable Tray Faults and Solutions

Here we introduce various types of faults that may occur in cable trays and their solutions in details, hoping we can help you in some way.

Modeling cable tray horizontally
