## Overview

---

Where cables enter a distribution board from trunking, the cables must be protected from any sharp edges in order to comply with 522. Common methods of complying include deburring edges and using grommet strips or manufactured spacers. Whether it is residential buildings, commercial facilities or industrial sites, the. It receives power from the main electrical supply and divides it into separate circuits, each. After introducing the Type B Distribution Boards and compliance with standards in the first part of the Hager Distribution Boards guide, in this article we're presenting the Cable Entry and the Isolation and Switching of the Hager Boards.
