Can routers and switches be connected using fiber optic cables

Overview

The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic. If you have multiple Ethernet switches that need to be connected over long distances, fiber is obviously a preferred choice. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Is it possible to connect a router and a switch using fiber-optic cable in Packet Tracer?

Second question: Is there a way to connect a router and a switch using fiber-optic cable?

I am trying to connect a switch that has multiple servers connected to it to a router.
