

Adam Tas Corridor Energy

Colorship an Israeli optical module company

Overview

ColorChip is a provider of hyper-scale optical transceivers that support high-definition, video, and data transmission in telecommunications, networking, cloud, and storage applications. ColorChip accelerates mega-datacenter performance, minimizing \$/Gbps rates and maximizing power efficiency. ColorChip is an acquired company based in Yokneam Illit (Israel), founded in 2001. 4M in funding from investors like Bessemer Venture Partners, Vintage Investment Partners and. As a category leader and OCP transceiver of choice, our SystemOnGlass integrated optics platform is redefining the capacity of top-tier carrier-grade. The round was led by Israel Growth Partners (IGP), a tech-focused growth equity fund, with participation from Vintage.

Colorship an Israeli optical module company

Optical transceiver vendor ColorChip raises \$20 million

Privately held Israel-based optical transceiver vendor ColorChip has announced receipt of \$20 million in new growth-funding.

Optics

OPTICS Tritech offers a wide range of optical components, solutions and systems to the Medical, Industrial, Military, Communication and Automotive market.

ColorChip 2026 Company Profile: Valuation, Funding & Investors

Manufacturer of application-specific photonic integrated circuits intended for optical subsystems, video, and data transmission.
