Core Storage Switch Configuration

Overview

This installation guide provides procedures for setting up, configuring, and managing the Core Switch 2/64 and Core Switch 2/64 power pak. OVERVIEW
The HP StorageWorks Core Switch 2/64 is a high-performance core switch for large storage area networks, available with 32 to 128 ports (a 128 port switch is configured as two 64 port switches in a single chassis). Both IPv4, IPv6, and many protocols are supported for copying cores to file space on remote hosts.
