Data Center Renewable Energy

Data Center Renewable Energy

How Renewable Energy Powers Data Centers: 2025 Guide

Discover how renewable energy powers data centers with solar, wind & battery storage. Real case studies, costs & ROI from 15 years industry

How Renewable Energy Is Powering the Next

Pressured by global sustainability goals, evolving regulations, and rising public expectations, data center operators are embracing renewable energy

Flexible Data Centers Soon To Run On Renewables

Long-duration battery storage is arriving now, giving data centers a path to cleaner, more flexible power. Flexibility is a new form of grid currency.

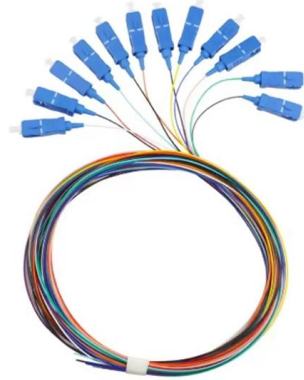

Using the ocean to power data centers

The renewable energy company Panthalassa says it has a solution to the proliferation of AI

2025 ESG Report: Data centre environmental impact

The 2025 ESG Report finds that while data centre energy usage continues to rise - now accounting for more than 1.1% of global energy consumption - average

Mandate 100% clean energy for data centre approvals

An alliance of 11 major industry, environment and union groups have delivered a plan to the federal government that proposes data centre operators

Fermi IPO Rides AI Power Boom as Data Centers Lock In Renewables

Fermi has filed for a U.S. IPO as demand for artificial intelligence drives a boom in energy-hungry data centers, forcing developers to strike long-term deals for renewable power and nuclear

Nvidia reaches 100 percent renewable energy target

All of the energy Nvidia is buying is now from renewable sources, the GPU maker has said. In its recently published Fiscal year 2025 Sustainability

Renewable Energy for Data Centers: The Top 5 Solutions

Explore the top renewable energy for data centers. Discover how solar, wind, batteries, fuel cells, and microgrids improve reliability.

ArcusAI: AI-Powered Platform Speeds Approvals for

ArcusAI's platform offers a transformative solution for renewable energy and data center developers seeking to navigate the complexities of grid

Data Centers And Renewable Energy Integration

Learn about the options for deploying renewable energy in data centers. Find out what other measures data center managers can take to improve

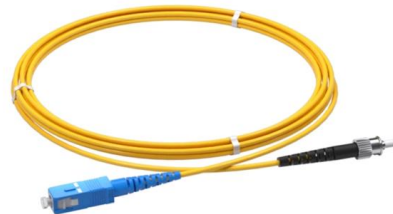

Facebook's EUR300m Irish data centre site is 100pc

The new Facebook data centre park in Clonee, Co Meath, is powered 100pc by renewable energy, the social media giant said.

Global energy in 2026: Growth, resilience and competition

For the global energy economy, 2026 is shaping up to be a high-stakes execution test shaped around three themes: growth, resilience and

Data center renewables demand drives strong Q2 for

Data center renewables demand drives strong Q2 for NextEra Energy Resources NextEra Energy's development arm signed deals for more than 3 GW

Could Aging Coal Plants Be Transformed into

Renewable Data Center Energy Storage? A startup spun off from Google's research arm proposes

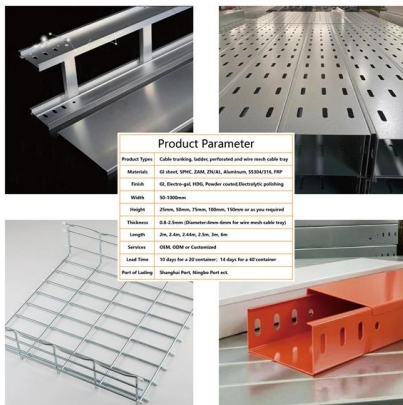

In focus: Data centres - an energy-hungry challenge

Data centres are a vital infrastructure supporting our ever-growing use of cloud storage, social media, AI, streaming services and more. They're also

Meta starts building USD-1.5bn renewables-powered

Meta Platforms Inc (NASDAQ:META) has kicked off construction on a large clean energy-powered and AI-focused data centre in El Paso, Texas, with

Polar announces new AI-ready data center powered by

Polar today announced the construction of a new multi-phase data center in Tørdal, Norway. It will be purpose-built for AI workloads and powered

Top 10: Data Centres Using 100% Renewable Energy

From Portugal to Las Vegas, here are the world's 10 largest data centres powered entirely by renewable energy, ranked by total IT capacity and

Understanding renewable energy use in data centres

As data centres globally and in the UK are substantial electricity consumers, shifting them to operating with renewable energy will be crucial to

The renewable route for data centre expansion , The

When new, massive data centre loads and substantial renewable energy sources are connected to often legacy grid infrastructure, it can lead to

AI Boom Faces Power Crisis Without Global Renewable Surge

The global AI and data center boom requires a massive acceleration of renewable energy rollout and grid investment, or millions of people face a future of energy poverty as power bills

TotalEnergies Signs its Biggest U.S. Renewable Energy

France-based energy giant TotalEnergies announced today that it has signed two new long-term Power Purchase Agreements (PPA) with Google,
