Distribution box PRC

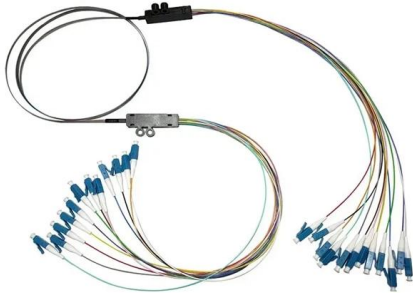

Overview

Pluggable power distributors reliably supply devices with power in indoor and outdoor applications. The distributor boxes are pre-assembled and allow easy and time-saving installation with PRC series connectors. Phoenix Contact PRC Connectors and Energy Distribution Modules include inverted circular connectors, angled circular connectors, energy distribution modules, and patch cables. The connectors are offered in 3- or 5-position configurations with up to 35A current rating and can be color-coded. They take up less space than loose wires, look neater and more organized, and keep cable replacement simple in areas where cables are easily.
