## Overview

---

Electrical lighting distribution boxes, also known as lighting control panels or lighting distribution boards, are specialized enclosures designed to house and protect electrical components that control and distribute power to lighting circuits. Every flex7 Lighting Distribution Box is supplied with 2 x steel mounting clips, 2. Through-wiring within the luminaire is not possible for certain luminaires or connecting pillars. The distribution fuse box forms the heart of every electrical system and ensures that lighting systems can be operated safely, efficiently and in accordance with standards. It protects cables and devices from overload, disconnects circuits in the event of a fault and thus guarantees maximum safety.
