Dual-core firewall on a switch

FortiSwitchOS Switching Reference Architecture Guide

This network topology offers next-generation firewalls with advanced security, core routing, switching, and wireless. This single-pane-of-glass management provides complete visibility and control of users

Types of Firewalls Defined and Explained

Discover the different types of firewalls and their functions. Learn which firewall solution best fits your organization's cybersecurity needs.

Link between Firewall and Core Switches : r/networking

Link between Firewall and Core Switches We will soon be deploying some core switches. When going upstream (towards outside) from the core L3 switches to a set of firewalls, I'm unsure if the the links

HA Firewalls and Switch best practice : r/fortinet

This allows me to avoid a FG failover if a switch fails, and both switches stay functional if a FG

fails. It requires a few more ports and cables, but it gives you complete redundancy from the

Recommendation for a connection between Core Switch and Firewall

Hello, I am asking myself what others recommend for the connection between core switch and Firewall. The setup is the following: Two Catalyst 9300 Core switches in stack. The stack

Splitting a single ISP line through a core switch to 2 firewalls best

It does matter because your core switch is now on the wrong side of the firewalls and are theoretically exposed. If you're buying multiple firewalls in order to add redundancy it makes no sense to put it all

Technical Note: How to add and manage two FortiSwitches by a

This article shows how to link two FortiSwitches together and manage both switches by FortiGate via a single link. All FortiSwitch devices must be running FortiSwitchOS 3.4.2 or later.

Core layer , FortiSwitch 7.4.0 , Fortinet Document Library

The core layer is critical, yet very simple to design, and allows for network evolution quite easily. Point-to-point links are used between each element, and Fortinet recommends using the MCLAG and dual

Next-Gen Firewalls & Topologies. Designing & Building

The dual-firewall or screened subnet topology provides a high level of security for organizations that require strong isolation between the internet, DMZ zone, and

Multiple FortiSwitches managed via hardware/software switch

This example provides a recommended configuration of FortiLink where multiple FortiSwitches are managed by a standalone FortiGate as switch controller via hardware or software switch interface;

Firewall types and architecture , Infosec

Firewall architecture implementation There are four common architectural implementations of firewalls widely in use. They are packet filtering routers, screened host firewalls, dual-homed

Two Fortigate firewalls and one Cisco layer 3 core

My client bought one Cisco layer 3 switch and two Fortigate Firewalls. His requirement is like, two firewalls will be in HA mode and they will be the uplink

Re: Fortigate HA over two internal switches (two core setups)

You can configure HA (Active/Passive) on a FortiGate 70F or 80F using a VLAN over your core-switches. While this is less conventional than a direct connection, it's feasible provided the

Cisco Secure Firewall 4200 Series Hardware Installation

The Secure Firewall 4200 supports two power supply modules so that dual power supply redundancy protection is available. Facing the back of the

Dual Firewalls to separate DMZ's and internal LANs at home

If your firewall can handle the load, enable IPS and setup a logging server that collects logs from your firewall (and other devices such as switches, APs etc).

Integrate Redundant Solution for Secure Firewall and L3

This document describes a best practice for redundant connections between Cisco Catalyst Switches and Cisco Secure Firewalls on High Availability.

Routing on firewall or core switches? : r/networking

In my research I'm getting mixed suggestions - Some say that core switches are for routing, when others say that core switches have to be as fast as possible and have minimal tasks

Gateways on Core Switch vs Firewall : r/networking

Gateways on Core Switch vs Firewall I'm struggling with some design options for a network redesign I'm planning at my company. The background: Today I'm running a relatively simple network topology.

I finally grasp how to split up an ISP connection for two firewalls

You can also technically do this on a switch downstream of your firewall. Some by policy don't ("no dirty traffic on the core switches") but I personally think it's fine as long as it's configured properly.

Fortigate HA over two internal switches (two core setups)

You can configure HA (Active/Passive) on a FortiGate 70F or 80F using a VLAN over your core-switches. While this is less conventional than a direct connection, it's feasible provided the

I finally grasp how to split up an ISP connection for two firewalls

I finally grasp how to split up an ISP connection for two firewalls, using a switch.

Configuration example for dual firewall setup needed

@ budspencer said in Configuration example for dual firewall setup needed: I have tried too many things to list, Yet you can't seem to list the

How to Connect Cisco switch for two firewalls

We are using the switch so we can connect both firewalls to the same two ISP's. There is a VLAN for each ISP set up on the switch. There are three

Catalyst SD-WAN Dual Router High Availability with NGFW

Introduction Achieving high availability in Catalyst SD-WAN deployments requires a multi-faceted approach. This strategy encompasses device redundancy through multiple routers, switches, and

Best Practices

Hi Everyone, Just trying to get some others insight on how this should be best configured. So we currently have 2 firewalls setup in an HA. We only had

Dual Firewall vs. Single Firewall DMZ: Comparing Network Security

Determining the Right Choice for Your Organization The decision between a dual or single firewall DMZ setup largely hinges on particular organizational needs, including the sensitivity

Sophos Switches , Control Device Access at the LAN Edge

Sophos Switches. 8, 24, and 48 port network access layer switches put you in control of secure device access for branch offices, retail and SMBs.

Single firewall connect to 2 core switches

Yes, firewall will create an aggregation port and assign an ip address, and connect to 2x layer 2 switches (Cisco 2960), which is access port, then the

Splitting a single ISP line through a core switch to 2 firewalls best

I'm an IT assistant at a rural hospital where we just bought a second Sonicwall firewall to add in as High Availability. We only have a single ISP line available at the moment and are looking into a second,
