Estonian Active Optical Cable PAM4

Overview

The generic compatible DSFP Active Optical Cables are parallel 100G small form factor, hot-pluggable 850nm AOCs. The cable integrates dual VCSEL lasers and PIN photo-detectors with PAM4 modulation, delivering up to 53. Siemon's 50G per lane PAM4 Ethernet or InfiniBand™ OSFP Active Optical Cable assemblies (AOCs) are designed to exceed industry standard performance offering a cost-effective, low latency, low-power option for high-speed data center interconnects. This document has been deprecated, for more information refer to Interconnect Product Specifications or contact your NVIDIA representative at Enterprise Support Services. We offer a wide range of cable installation services, including laying cable trays, burying underground cables, and installing overhead lines, as well as connecting and. 125 Gbps PAM4 signaling with lengths from 1m to 50m over OM4 multimode fiber, this AOC features integrated FEC for enhanced signal integrity.
