Fiber Optic Adapter Comparison Table

Overview

It is a precise coupling device that joins fiber optic cables quickly, enabling faster connection and disconnection than splicing. The connector mechanically orients the fiber cores, allowing light to pass and travel through the cable without interruption. It is a snap-on square connector with a simple push-pull motion, similar to the push-pull latching mechanism of ordinary audio and video cables. However, unlike the plastic-bodied SC and LC, it uses a circular screw-type fitting made of nickel-plated or stainless steel.
