# **Finnish OTN Router 200G**

## Overview

---

The D710 Series provides a cost-effective 200G solution for short haul and access networks, incorporating AES-256 Layer-1 encryption. It is suitable for Data Center Interconnection, Metro 10G/40G/100G Access, and Metro Aggregation Optical Transport Networks. FS transponder/muxponder aggregates 40G/100G into 100G/200G coherent DWDM uplink for up to 200G capacity transport over single wavelength, no need of dispersion compensation. Its flexible architecture enables the same device to be used in multiple applications and adapt to network growth and changes. To achieve massive information interaction and meet the demand for ultra-high speed and ultra-bandwidth data center interconnection (DCI), QSFPTEK has launched the 200G transponder - a customized OTN transmission platform for DCI applications. The 200G Muxponder transmitter supports two QSFP28 client interface and one CFP2 line-side interface to support single-channel 200Gbps large-grain data transfers. The industry's most advanced coherent technology and FEC forward error correction coding technology enable high-capacity, long-distance.
