# H3c optical module structure

## Overview

---

The module contains 4 channels of 25Gbps VCSEL and PIN photodetectors, transmitting and receiving over a simplex LC fiber using SWDM4 optics. Optical modules are widely used in switches, network cards, routers, and other communication equipment. on a unified wired-WLAN sw e presents a wireless terminator resents omnidirectional signals onfiguration, or software version. All-optical networks use optical signals to complete all network communication functions, eliminating the need for optical-electrical conversion within the network, thereby bypassing the challenge of improving the information processing rate of electronic devices.

### H3C All-Optical Network Technology White Paper-6W100

All-optical networks use fiber as the transmission medium, which features long transmission distance, high speed, low attenuation, strong anti-interference capability, and long life cycle.

### Genuine H3C Transceiver Modules

The H3C QSFP-40G-CSR4-MM850 QSFP+ Optical Transceiver Module is designed for use in 40GBASE Ethernet throughput up to 400m over

multimode fiber (MMF)

### H3C All-Optical Network Technology White Paper-6W100

H3C provides an extensive array of iOptic Ethernet switches and PON network devices, encompassing all categories of all-optical network devices from core to access.

## Support

- The transceiver module is not from H3C.
- The transceiver module does not support digital diagnosis.
- The transceiver module has failed.
- The device/optical interface has failed.
