High-precision Industrial Ethernet Modular Data Center in Rwanda

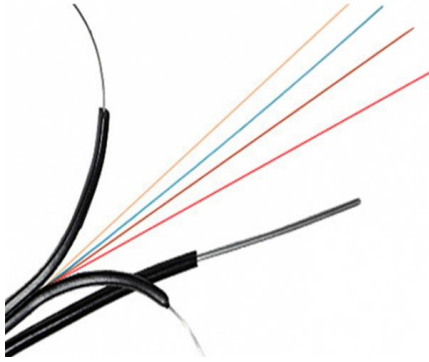

Overview

Article Summary: Africa Data Centres plans to build its first data center in Kigali, Rwanda, as part of its expansion into East Africa. This report is part of a series of market briefs developed by Xalam Analytics at the behest of Digital Investment Facility (DIF) under the Data Governance in Africa Initiative, on the data center market opportunity in sub-Saharan Africa ("SSA"). Nikstalis addresses a critical gap in sub-Saharan Africa's digital landscape: the acute shortage of carrier-neutral, Tier-certified. See how Global Project Tracker can help you discover new construction projects, win more bids, and save hours of research. Announced this week, the Cassava Technologies unit said the purpose-built facility will offer 2MW of capacity. The 2 MW facility will connect to the existing Nairobi site, serving the region's growing demand for digital services. In the heart of Rwanda, Kigali stands as a beacon of technological advancement and innovation. At DC Deployed, we are proud to extend our expert services in Data Center Construction Management to this vibrant city.
