How is the Turkish 96-core ADSS optical cable

Overview

Outdoor dry core (ADSS) optical fiber Multi Loose Tube cable with aramid yarns as strength member and polyethylene outer jacket. AllWave+ Fibre offers the exceptional performance of our AllWave Fibre specifications along with a 40% smaller minimum bend radius, a 50% lower bend loss and a 33% improved polarization mode dispersion (PMD) link design value. However, choosing the right ADSS cable can be overwhelming due to the variety of types and specifications available. All Dielectric Self-Supporting (ADSS) cables, available in configurations such as 24, 48, and 96 cores, are designed to effectively span lengths of 80m, 100m, and 120m. American Tech Supply Can Deliver ADSS Fiber Cable, Ribbon Cable, all armored, Gel and Gel Free singlemode fiber cable from 6 fibers to 144 fibers to 432 fiber up to 864 fibers which is Telecordia approved and meets all GR 20 Requirements for Optical Fiber and Optical Fiber Cable. This specification covers the design requirements and performance standard for the supply of optical fibre cable in the industry. ARTIC ensures a stable quality control system for our products through several programs including ISO 9001, ISO 14001 and ROHS.
