How much does a single-mode 4-core fiber optic pigtail cost

Overview

Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. These include the quality of raw materials, manufacturing standards, jacket type, length, and additional features such as armored protection or UV resistance. Here's a general pricing reference: These are indicative prices based on standard configurations.
