How much does stainless steel wire for optical fiber cables cost

Overview

The wide price range reflects differences in fiber strand count, outer jacket construction, and application type. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Long Lead Times for Custom Specs: Bespoke OPGW or hybrid cables can have extended manufacturing cycles. The stainless steel sheath provides excellent protection for the optical fibers inside, making them more durable and resistant to damage.
