# **How to budget the cost of removing optical cables**

## Overview

---

To estimate and control the cost and time of fiber optic cable termination projects, start by clearly defining the project scope and conducting a site survey. Calculate material, labor, and equipment costs, adding a contingency reserve for unexpected expenses. Sometimes the power budget has both a minimum and maximum value, which means it needs at least a minimum value of loss so that it does not. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more.
