How to configure the S5700 optical module

Overview

Configure the first two 10G optical ports of each S5700-28X-LI-AC switch as logical port 1, and the last two 10GE optical ports as logical port 2. When the optical module on an interface is faulty, you can run the display commands to view information about the optical module. How to Stack Huawei S5700-28X-LI-AC Switches Through Service Ports?

Solution: The stacking method and steps for Huawei S5700-28X-LI-AC Switch are as follows: The connection topology for service port stacking includes chain and ring connections. Step 2: Take out the optical module, ring and label up, the gold finger is facing down, Note that the right. Why Does the S5700 Fail to Restrict User Access Through a Traffic Policy (V200) What is TACACS and How to Configure TACACS?

What is BPDU Protection and How to Configure BPDU Protection?

What Is a Trunk Link What Is Mirroring What If I Forget the Passwords of S200, S1700, and S5700 Switches (V200). This guide describes how to install S2700, S3700, S5700, and S6700 series switches.

How to configure the S5700 optical module

S2700, S3700, S5700, and S6700 Series Switches Quick Start Guide

To use a front 4xGE or 4x10GE optical interface card on the S5700-SI, S5710-LI and S5700-EI, you must also install an extended rear card ES5D00ETPB00. Otherwise, only two ports instead of four

S3700, S5700 and S6700
