How to disconnect a power fiber optic cable

Overview

In this section, we'll walk through all the steps to terminate a fiber cable with a connector in less than 5 minutes. You'll need to prepare: a cleaver, a stripper, a cable clamp, a gauge, Kevlar scissors, cleaning supplies and the connector. As an experienced technology writer who has covered broadband advancements for over a decade, I aim to provide readers with trustworthy instructions endorsed by industry experts. Unplugging a fiber optic cable from a modem is a task that requires careful handling to avoid damaging the delicate fibers within the cable. This protects the internal electronic components and helps ensure the fiber port is inactive, minimizing the risk of exposure to the infrared light signal.
