

# How to plug in the mobile terminal box

Motor protection controller

## Overview

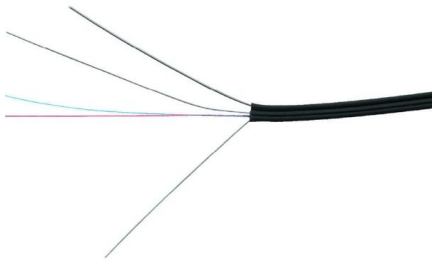

---

PowerBox product with its own power supply and data connector with power source: Connect the 3-core lead to the USB/Data socket. The Mobile Terminal is a small, convenient handset which is used to adjust and update all update-capable PowerBox products. A powerful 32-bit processor with Wifi and Bluetooth, in conjunction with a touch-screen which is clearly legible in sunlight, make the unit similar to a smartphone in use. Provides alphanumeric text and images within 65,536 colors and 130 x 130 pixels with backlight, scalable fonts, and contrast.
