# **Huijue Layer 3 Aggregation Switch**

## Overview

---

Aggregation switch for small and medium-sized campus networks, with eight 10G uplink optical ports for high-speed data transmission; 24 x 1GE optical ports (with eight combo ports), providing high-speed network experience for long-distance services. What Is an Aggregation Switch?

An aggregation switch is a network device that consolidates traffic from multiple access switches, wireless access points, or other edge devices and forwards it to core switches or routers. Founded in 2002, Huijue Group is a high-tech service provider integrating intelligent energy storage equipment and computer intelligent network communication system integration and application. Huijue Network's products are exported to Europe, North America, Southeast Asia and other countries and. It is applied in enterprise campus network and easy to deploy Layer3 switching solution that offers enhanced security and 10GE uplinks, RIP/OSPF/BGP/IS-IS, L2&L3.

### More durable and robust

The outer layer is made of environmentally friendly PVC, which is soft and elastic. It can be stretched without damage, so you can use it with confidence.

### Everything You Need to Know About Aggregation Switch

An aggregation switch operates at Layer 2 or Layer 3 of the OSI model, depending on the configuration and topology of the network. The

### H3C S6890 Switch Series Ethernet Link Aggregation Configuration

Configure Layer 2 aggregate interface Bridge-aggregation 1 as a trunk port. Assign the aggregate interface to VLAN 10 and VLAN 20.

In simple campus scenarios, the switch can achieve easy configuration and high information security, while in large-scale interconnecting scenarios, the switch can realize auto-negotiated update of

### Support

- Displaying the local system ID · 28
- Displaying link-aggregation load sharing information · 28
- Displaying and clearing interface statistics · 28
- Clearing LACP statistics for link aggregation member ports · 29

### Ubiquity Hi-Capacity Aggregation (USW-Pro-Aggregation)

Product Description The Hi-Capacity Aggregation (USW-Pro-Aggregation) is a high-performance Layer 3 switch designed for high-speed 10G and 25G aggregation in enterprise and data center environments.

## What is Switch Aggregation, Its Role and Selection Advice

The aggregation layer serves as the convergence point for multiple access layer switches and is responsible for handling all the communication traffic from the access layer devices

## Support

On an IRF 3.1 system, an aggregation group is called a Layer 2 extended-link aggregation group if its member ports are on PEXs. The logical interface of the aggregation group is called a Layer 2
