Indoor Optical Cable Solution Design

Overview

Founded in 1932, ACOME is a leading industrial cooperative group, headquartered in Paris (France), specialising in the design, manufacture and marketing of high-tech cables, microducts and connectivity equipment for telecom, data and automotive networks. The Indoor Discreet Cabling Solution kit is an optical outlet extension system that can be adapted to any type of housing. The optical outlet can be installed on any surface (screw fixing or adhesive sticker) and includes a 30 m discreet micro-cable reel (almost invisible to the naked eye). Optical fiber cables are designed to provide optimum performance over their service life when deployed in applications for which they are intended. As our reliance on fast, reliable internet connectivity grows, so does the importance of.
