

Installation of the distribution box inside the column

Product Composition Description

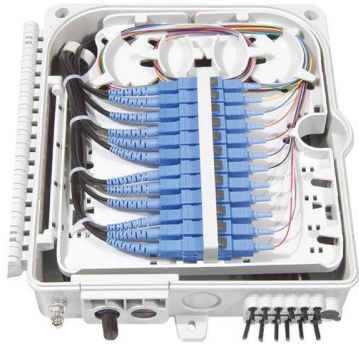

Overview

Straighten the angle steel, measure the dimensions, mark the cutting lines based on the dimensions, perform bending and cutting, locate the drilling positions, and finally weld it. Mock-up all internals on the ground adjacent to the tower before starting the installation inside the tower. Mounting bracket is a flexible structure, which makes it easy to adjust or replace the electrical components. All the components, wires and connections are under the protective cover due to the same height.
