Is a fiber optic router always necessary for fiber optic connections

Overview

The short answer is no, you don't necessarily need a special router for fiber optic internet. A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. This guide clarifies the requirements for optimal performance, explaining what your existing router can handle and when an upgrade is essential for unlocking the full potential of your blazing-fast fiber connection. I Regularly check for compatibility between your router and the ONU to avoid connectivity issues and ensure optimal performance. Instead of a traditional modem, fiber internet requires an Optical Network Terminal (ONT) that converts light signals into electrical signals your devices can understand.
