Is it better to seal a network server rack

Overview

Sealing the many different gaps in data center IT equipment racks is one of the fastest and most cost-effective ways to protect IT equipment and reduce cooling costs. Sealing these gaps within and along the sides of cabinets can lead to many benefits within the data center including cost savings, increased equipment. 3U, 9U and 12U blanking sheets easily integrate with award-winning HotLok Blanking Panels to seal these gaps. The Cool Shield AirStrip is an expanding foam tape designed to prevent unwanted air loss from gaps in contained aisles, server rack rows and data center infrastructure.

Is it better to seal a network server rack
