Is it okay to place a network cabinet on the balcony

Overview

The walls can block the signal from your device, and the lack of airflow can cause it to overheat. While it may be tempting to keep the router out of sight for a cleaner look, you should avoid placing it inside a. Avoid placing the router near other electronics or water sources as these can interfere with or absorb the Wi-Fi signal. Wi-Fi coverage might feel like magic, but the underlying behavior of radio waves is governed by physics, signal attenuation models, environmental absorption rates, and antenna radiation patterns. Most connectivity problems, slow speeds, unstable ping, dead zones, originate not from hardware. The location of your router is crucial if you want to enjoy a fast and reliable WiFi connection throughout your home. WiFi signals need open space to travel effectively, and enclosed areas create barriers that weaken the signal before it even leaves the immediate.
