Italian Active Optical Components QSFP

Overview

AOC's QSFP+ offer customers flexibility of traditional optical modules by interfacing to systems via a standard InfiniBand, Ethernet, Fiber Channel and other applications. The acronym QSFP stands for Quad Small Formfactor Pluggable, and QSFP is a family of connectors and cable assemblies that share a mating interface. A mating interface is where the two separable pieces of a connector system that come together to form an interconnect. Siemon option for 40Gb/s high-speed Low data Power with four fiber optic transceivers per end, each operating at data rates from 1 to 10. Optical Cable These (AOC) assemblies incorporate a cost-effective, integrated opto-electronics extended reach reach up. It integrates four data lanes in each direction with 40 Gbps aggregate bandwidth.
