

Adam Tas Corridor Energy

Jamaica EPON device 1G

Overview

It is a low cost and high speed ONU access device installing in the indoor and corridor with the deployment of FTTH, FTTO, FTTB. AFEN-01GS transmits data, voice and digital video by flexible PON network structure. GEPON ONU with 1 port GEPON (SC/UPC), 1 port 10/100/1000Base-T (RJ45) Devices belonging to the ONU group are Optical Network Unit terminal subscriber equipment operating on Gigabit Ethernet Passive Optical Network (GEPON, IEEE802. It's capable of preventing rouge ONU, hardware dying gasp, and DDOS filtering based on ACL/MAC/URL. It features one XPON port, one GE port, one FE port, one USB port, and external dual antennas with up to 300 Mbps WiFi to meet basic broadband needs. 1G-EPON has been a largely successful optical access technology, deployed in different scenarios around the world. The terminal devices are designed for fulfilling FTTH and triple play service demand of fixed network operators or cable operators. The ONU automatically switches into the corresponding PON mode by identifying the local OLT mode to complete GPON/EPON/XPON adaptive access. 3C-XM100DG features high-performance forwarding capabilities to ensure excellent.
