Japan optical delivery box 24 cores

Overview

FTTH 24 core fiber terminal box is suitable for the distribution and terminal connection for various kinds of optical fiber system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cores or pigtails are connected. It is a versatile and highly protective solution suitable for both indoor and outdoor use. Fiber Optic Distribution box is used as a termination point for feeder cable to connect with drop cable in FTTH communication network.
