# **Methods for Installing Optical Cables in the Field**

## Overview

---

When it comes to installing Optical Fiber Cables in outdoor environments, two primary techniques stand out: Trenching for Fiber Optic Cables and Direct Burial Fiber Optic Cables. Each method offers distinct advantages and is tailored to specific environmental considerations. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. This guide will explain the entire set of activities involved in installing Fiber optic cable contractors -from the early planning stage right through testing-for facility managers, IT teams, and low-voltage contractors to build high-performance networks safely and efficiently. At the FOA, we're mainly concerned with communications fiber optics - telco, CATV, LAN, industrial, etc.
