# **Mobile Fiber Optic Cable Maintenance System**

## Overview

---

Monthly Maintenance: Randomly inspect fiber optic cable connections, test backbone fiber optic link attenuation, and clean connector end faces. Some people have suggested that fiber optic networks need periodic maintenance, including microscopic inspection of connectors and mating adapters and even insertion loss testing or taking OTDR traces. Fiber optic network optimization has become a key task to ensure efficient operations with the ever-growing demand for data transmission and the increasing need for high-speed, low-latency connectivity.
