## Overview

---

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. Fiber to Ethernet media converters adapt between a typical RJ-45 copper Ethernet cable and fiber-optic cable. Learn more [Need help?](#)

Fiber optic network switches are essential elements in modern communication infrastructure, providing fast, high-bandwidth communications in a variety of industries ranging from massive data centers and telecom networks, through industrial automation systems to cutting edge technologies such as IoT.
