Nordic Micro Module Prices

Overview

Browse Nordic nRF52 and nRF53 microcontrollers with BLE, Thread, and Zigbee. The nRF54L Series offers SoCs that combine an efficient MCU with ultra-low-power wireless connectivity. The nRF54LM20A provides the largest memory option in the series, with 2 MB NVM and 512 KB RAM. It features an extended set of peripherals, high-speed USB, and is available with up to 66 GPIOs. Power Management IC Development Tools Evaluation Kit for the nPM1100 PMIC (Power Management IC). To get a Bluetooth or other wireless product on the market, there are a range of qualifications and approvals you will need to meet to prove that the product meets wireless standards. If you have a custom PCB design and you'd like to add a little Bluetooth Low Energy, this module is ultra compact and easy to use.
