Optical Module ea

Overview

The C13367-1350EA is an optical measurement module that can detect low-level light. This module consists of an MPPC, an amplifier, a high-voltage power supply circuit, and a temperature compensation circuit. The EML (Electro-absorption Modulated Laser) transmitter evaluation board consists of a conventional Distributed Feed-Back (DFB) laser and EA modulator. The modulation signal is applied to the modulator section while the laser section operates CW allowing extremely low wavelength chirping. Chip on carrier of EA-DFB laser monolithically integrated with SOA is useful for various optical sub-assembly (OSA). Huawei OptiXaccess EA5801E is a box-shaped Optical Line Terminal (OLT) with Gigabit Passive Optical Network (GPON) access, supporting both Passive Optical LAN (POL) and Fiber To The Home (FTTH) solutions. It carries all services over a single fiber network, considerably simplifying network.
