Optical Port Interconnection between Two Switches

Overview

To connect multiple Ethernet switches, the best way is to use a multi-strand fiber cable. The 4-strand pre-terminated fiber optic cable consists of four individual strands or fibers of glass or plastic fibers enclosed in a protective sheath. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. - Did you mean the patch lead?

otherwise you'd need right length LC-LC patch leads as well. there are few variations and if you need one specific type, you could have "Multimode 50/125 OM3 type fibre cable with LC/LC terminators" I'd just start with one link first and test the connectivity, If its.
