Laser Power Meters

Laser Power Meters are ideal for measuring the energy output of laser beams for testing or laser system applications at Edmund Optics.

Optical Power Meters - optical power measurement

What is the difference between an optical power meter and an optical energy meter? An optical power meter measures optical power (energy per unit time), typically

OEM Optical Power Meter Factory, Suppliers

It features an easy-to-read display and user-friendly interface, making it suitable for both experienced professionals and beginners, Engineered with advanced technology, our Optical Power Meter

Optical Power Meters - optical power measurement

Optical power meters are instruments for optical power measurements, based on heating of an absorber structure, for example, or on a photodiode.

Optical Power and Energy Meters

Powered by LaserPoint technology, these meters are available as integrated meters that connect directly to a computer's USB port as well as stand-alone power

1936-R Optical Power Meter

The 1936-R Single Channel High Performance Optical Power and Energy Meter is one of the most sophisticated optical meters available in the market. The RoHS

Displays and PC interfaces for laser power monitoring and reading

Read and monitor your laser power with Gentec-EO's display devices and PC interfaces. Our technology measures from 0.3nW up to 100,000W. OEM and customization are available for all products.

The 843-R low cost power meter is capable of measuring power level from pJ and pW to thousands of Watts, in a compact body. 843-R has two display modes: a large digital display with a bar graph or

Optical Power and Energy Meters

The consoles (PM100A, PM100D2, PM100D3, PM400, and PM5020) when paired with our extensive line of power and energy sensors provide calibrated (NIST traceable) measurements across a broad

Optical thermometry using efficient upconversion luminescence in Er3

Er3+ possesses abundant excited state energy levels in the near-infrared region, enabling efficient upconversion luminescence by absorbing different near-infrared wavelength light.
