Beam splitter fix? : r/fo76

So with the beam splitter you got eight of those. So the projectile replacement chain was: plasma ball (from ammo) -> flamer cloud (from beam splitter) -> explosive bullet (from Explosive legendary effect)

Beam Splitter

A beam splitter is defined as an optical device that effects a linear transformation of fields presented at two input ports, producing output beams that are related to the input fields in a characteristic manner

Fundamental properties of beam-splitters in classical and quantum optics

A lossless beam-splitter has certain (complex-valued) probability amplitudes for sending an incoming photon into one of two possible directions. We use elementary laws of classical and quantum optics
