Peru Optical Line Terminal SFP

Overview

Easily configure the OLT and manage multiple sites using the comprehensive UNMS software. Client and Uplink Connectivity: The OLT features eight PON ports to connect up to 1024 Nano G devices, and two SFP+ ports deliver up to 20 Gbps of uplink connectivity. At the heart of a point-to-multi-point or passive optical network (PON) is the optical line terminal (OLT). Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten.
