Price quote for 72-core single-mode fiber

Overview

The 72-core single-mode fiber optic cable supports transmission of a single light path, or mode, which makes it ideal for long-distance telecommunications and data transfer. The tubes (and fillers) are stranded around a FRP (Fiber Reinforced Plastic) as a non-metallic central strength member. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000.
