Replacing the distribution box requires the main line

Overview

Route the main power cable (often a thick three-wire cable) from the utility meter into the distribution box. Septic system distribution boxes are designed and used primarily for standard type effluent dispersal fields allowing installers to either balance effluent flows to multiple leach lines or provide "serial overflow" distribution, a process by. The installation of a new distribution box takes place in several phases, which must be carefully coordinated. Choose the right box based on environment (indoor/outdoor), load capacity, and durability.
