# **Russian Four-in-One Fiber Optic Distribution Box**

## Overview

---

FDB-04 Series 4 ports Fiber Distribution Box, also called Splitter Distribution Box or Fiber Terminal Box, can be used in FTTH projects and is suitable for corridor, basement, room, and building's outer walls application. It typically contains splice trays, adapters, and cable routing components to manage fiber connections. Plastic distribution boxes are designed for installing optical data lines when building FTTX and PON networks both indoors and outdoors. The fiber splitter distribution box supports fiber splicing, splitting, distribution, "three in one" and fiber optic distribution box also offers solid protection. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function.
