# **Secondary Distribution Box Protective Panel**

## Overview

---

This transparent protective cover is designed for panels and control cabinets, providing maximum protection in demanding industrial and environmental conditions. Primary distribution systems consist of feeders that deliver power from distribution substations to distribution transformers. Most of the time, each of these secondary circuits will be protected with a fuse or breaker. Made from high-quality polycarbonate (PC), it is resistant to water, dust, impact, and corrosion. These are available in a range of materials including Stainless Steel, GRP & Sheet Steel from IP42 (Indoor) to IP 66 (Outdoor) Applications. Medelec designs protection and control panels to cater for various applications according to customer requirements, using latest technology relays which are supplied by Schneider Electric, Siemens and ABB.

### POWER SYSTEM PROTECTION & CONTROL PANELS GUIDE

Our panel designs take numerous factors into considerations such as: ambient conditions, site

installation and personnel safety without compromising the ease of operation, security, maintenance

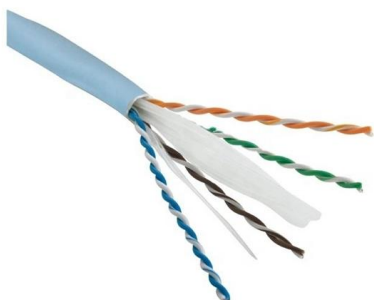

## Distribution Panel Surge Protection

Distribution panel surge protection in industrial facilities is a proactive measure that protects electrical infrastructure, minimizes equipment damage, prevents

## Panel Board Distribution

These Type 1 and 2 surge protector are ideal for protecting products fed from a panelboard location, as well as high end pieces of equipment such as X-ray machines, CAT scan machines, life support

## A Complete Guide to Distribution Boards

A distribution board or breaker panel separates incoming mains power into various sub-circuits. Usually, all the fuses, breakers and other circuit

## Transparent protective covers for electrical distribution panels , boxes

Transparent protective covers for panels are specialized components designed to protect the electrical panel components from dust, moisture, and mechanical damage. These covers allow a clear view of

## PV Box 2 String 1000V DC Protection Panel

Protective electrical panel, prefabricated, watertight, and surface-mounted, with 4 fuse holders and 2 two-pole DC surge protectors, specially designed for two Strings.

## Understanding Sub Panels: Secondary Power Distribution at a Glance

A sub panel is a secondary electrical panel that distributes power from a main panel to specific areas or devices within a building. It includes components like circuit breakers or fuses to

## Distribution Box Guide: Types, Components & Solutions
