Should the fiber optic cable be connected to a gateway or a router

Overview

The answer isn't as straightforward as a simple yes or no—it depends on the type of router, the fiber setup, and the kind of connection your ISP (Internet Service Provider) provides. Fibre optic broadband require a modem or Optical Network Terminal (ONT) to connect to. The process to connect fiber optic cable to router requires careful attention to detail, but I'll walk you through every critical step with the precision and clarity you deserve. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled).

Should the fiber optic cable be connected to a gateway or a router
