What to confirm before you commit: accepted cable types, spool return terms, condition standards (what counts as "returnable"), and freight rules. Best for: Sites with "everything at once" loads—cable plus electronics, racks, small devices, and miscellaneous telecom gear. Fibre cable salvage involves recovering and repurposing old or decommissioned fibre optic cables. These cables, originally installed to support communication networks, become obsolete due to technological advancements. Telecom equipment often stores sensitive business data that must be securely destroyed to. As the telecommunications industry continues to grow and evolve, the importance of fiber optic cable recycling and sustainability becomes increasingly evident.
